

PXI module carrier **NMPXI AXIe-1**

A PXI modules carrier "NMAXIe-1" is a Gen3 x4 module specifically developed to support the use of PXIe standard modules in AXIe systems, which allows for full use of the best qualities of both standards in a single system. The PXI modules carrier "NMAXIe-1" is a single-slot module in the AXIe-1 standard that can carry simultaneously two single-slot modules in the PXIe standard.

The PXI modules carrier "NMAXIe-1" doesn't require an installation of any special software, and allows communicating directly with PXIe measurement modules installed on the modules carrier.

Specifications

The number of installed modules - up to 2;	Interface - PXIe Gen3 x4;
Form factor of PXIe modules - 3U, single-slot;	The overall dimensions of the AXIe module are 280 x 30.48 x 322.75 mm
